Frontend: Bootstrap, React JS, Angular, Vite, Tailwind CSS, Next JS(In Progress), responsive web design, cross-browser compatibility.
Backend: PHP, C#, Laravel, MySQL, SQL Server, Firebase, ASP.NET Core(In Progress), CRUD, authentication and data management.
Development: DOM manipulation, event handling, API integration, clean code, UI/UX fundamentals.

Dev Tools: Vercel, Netlify, Git, GitHub. Chrome DevTools, VS Code.

PROFESSIONAL EXPERIENCE

Frontend Developer

Teyzix Core June 2026 – July 2026 | Karachi, Pakistan

- Developed Business Intelligence Dashboard User Interface.
- Developed SaaS Product Landing Page & Customer Onboarding Portal.
- Developed SaaS landing page with data is stored in local storage.

PROJECTS

Signature Men's Salon Management System

• Developed a complete salon management system by using HTML, CSS, JavaScript, Bootstrap, PHP, MySQL and presented the project at Aptech Vision 2026 at PC Hotel Karachi.

MarketLink – Agriculture Marketplace (Techwiz 7, 2026)

- Developed a web-based agricultural marketplace using HTML5, CSS3, JavaScript (ES6+), Bootstrap (latest), PHP 8.2 / 8.4 / latest — custom MVC architecture and MySQL to connect farmers directly with customers, featuring product listings, pre-orders, market locations, secure pickup verification and an AI-powered assistant, for Aptech TechWiz 7 2026.

Responsive Web Application

- Built responsive interfaces and projects including a Calculator, Recipe Finder, API-based Image Gallery, and Portfolio Website. All made with different technolies as mentioned on my github and linkedin includes HTML, CSS, Bootstrap, Tailwind CSS, React JS, JavaScript, and above mentioned skills

CRUD Applications

- Built CRUD Applications on PHP, Laravel, JavaScript, React JS.
